

## COMMITTEE ON MEDICAL EDUCATION

### SECOND ANNUAL GRADUATE FORTNIGHT

The Academy is making arrangements for a second series of lectures at the Academy, coördinated clinics, clinical demonstrations and courses in hospitals and teaching institutions of New York, on the subject of "Functional and Nervous Problems in Medicine and Surgery." The Fortnight will be held during the period October 7th to 19th, 1929.

It is believed that this year's subject will attract not only the medical profession generally but also social workers and those especially interested in public welfare. The field includes those functional disturbances which have been much neglected in the last thirty years in comparison with the structural disturbances of the human body.

Evening sessions will be held at the Academy at which well known authorities will discuss many phases of the general subject. During the mornings and afternoons specially prepared clinical programs will be presented in a number of the leading hospitals of the city. It is planned to present a full day's clinical program in each hospital co-operating in the Fortnight. Among the special subjects which will be considered in the lectures and clinical program are:

Sleep and insomnia	Post-operative neuroses
Headache and migraine	The psychoneuroses
Endocrines and the vegetative system	The cardiac neuroses
The involuntary nervous system	The digestive neuroses
General survey of visceral neuroses	The vascular neuroses
Metabolism and the vegetative nervous system	Shock
Allergy and the nervous system	Psychotherapy
The surgery of the vegetative system	Hysteria
Traumatic neuroses	Mental hygiene in connection with general practice
	Habit and conduct problems

The profession is generally invited to attend. No fee will be charged for attendance at any of the meetings or clinics on the program.
